○ Not growing fast. Soly research project. Ten to twelve active contributors currently. Most contributors are originally from two universities (NC state university and VANDERBILT university) which fund Riaps and are mostly grade students.
○ Looking for help and ideas to grow the OS community. Can LFE help here?
○ Barrier for Riaps is no large corporation sponsor
○ Barrier for commercial parties is that is currently no deployment outside the lab
○ Riaps has not yet discussed synchery possibilities with Hyphae, but it is on Riaps rader
○ Regular releases: 2x year
○ Licenses reviewed concluded that the way licenses are used in Riaps needs attention. Shulli suggests this becomes top priority to address this. John and Anto / Markus can help.
○ ACTION:
  ■ TAC agreed that their will be a follow-up in three months where RIAPS (Ken Dulaney) will give an update on the status on the discovered licenses issues and SBOM

● Annual Reviews
○ Remember that we are aiming to have all projects go through their annual review by the end of year. Details on this are at https://wiki.lfenergy.org/display/HOME/Technical+Project+Lifecycle#TechnicalProjectLifecycle-AnnualReviewProcess.
○ Schedule for upcoming reviews:
  ■ June 29 - CoMPAS
  ■ August 10 - OPEN
  ■ August 31 - OPEN
