Welcome

Welcome to the LF Energy Wiki. Here you can access information with a cross-project focus. For individual projects, follow the links below. You will need a Linux Foundation ID (created at https://identity.linuxfoundation.org/) to contribute. In the upper right of this page, select Log In to contribute.

LF Energy is a Linux Foundation project that provides a vendor-neutral home focused on building shared open source infrastructure to deliver unprecedented innovation in renewable energy, power electronics, electric mobility, and more.

LF Energy activities are driven from the LF Energy Guiding Principles, created and adopted by both the Technical Advisory Council and Governing Board.

Technical and Standards Projects

The LF Energy Foundation hosts a number of technical and standards projects, which are completely open to anyone to participate in subject to the contribution guidelines set by each community. Each of these projects is completely autonomous, with oversight by the Technical Advisory Council who sets a lifecycle for Technical Projects and Working Groups/Special Interest Groups.

Current Projects

Below is the listing of current projects hosted by the LF Energy Foundation. Click the logo to learn more about each project and scroll down on the pop-up to see additional details.

Wiki Spaces for Projects

A category is used to group together a list of spaces. You can display a category's spaces by selecting a category from below:

View Spaces with Category: Projects Active Wg Sandbox

Space: CoMPAS  Browse the "SHP" space Add a page to "SHP"
Space: Dynawo  Browse the "DYN" space Add a page to "DYN"
Space: EM2  Browse the "EM2" space Add a page to "EM2"
Space: EVerest  Browse the "EV" space Add a page to "EV"
Space: FledgePower  Browse the "FLED" space Add a page to "FLED"
Space: FlexMeasures  Browse the "FLEX" space Add a page to "FLEX"

Space: OpenSTEF  Browse the "OS" space Add a page to "OS"
Space: OperatorFabric  Browse the "OF" space Add a page to "OF"
Special Interest Groups (SIGs) and Working Groups (WGs)

Technical working groups are organized underneath the Technical Advisory Council in order to perform detailed work in a specific area. Working groups generally work on a specific aspect of the functional architecture. They may have a specific deliverable and can make suggestions on existing projects or propose projects.

Working group chairs or leaders report up to the TAC, but do not vote on TAC business.

Working groups are distinct from Projects, which create software or services, and Special Interest Groups, which meet regularly for discussions but do not have a specific charter.

Current Working Groups

To join any of the technical working groups, please click the mailing list link below and visit their corresponding wiki page.
