LF Energy

LF Energy is a Linux Foundation project that provides a vendor-neutral home focused on building shared open source infrastructure to deliver unprecedented innovation in renewable energy, power electronics, electric mobility, and more.

LF Energy activities are driven from the LF Energy Guiding Principles, created and adopted by both the Technical Advisory Council and Governing Board.

Presentation Template

LF Energy's technical projects are organized underneath the Technical Advisory Council in order to create specific software or services. Project chairs or leaders report up to the TAC, and projects at the Early Adoption or Graduated maturity level vote on TAC business.

Projects are distinct from technical working groups, which meet to develop or explore specific functional areas, or Special Interest Groups, who meet regularly for discussions but do not have a specific charter.

Current Projects

Below is the listing of current projects hosted by the LF Energy Foundation. Click the logo to learn more about each project and scroll down on the pop-up to see additional details.

Special Interest Groups (SIGs) and Working Groups (WGs)

Technical working groups are organized underneath the Technical Advisory Council in order to perform detailed work in a specific area. Working groups generally work on a specific aspect of the functional architecture. They may have a specific deliverable and can make suggestions on existing projects or propose projects.

Working group chairs or leaders report up to the TAC, but do not vote on TAC business.

Working groups are distinct from Projects, which create software or services, and Special Interest Groups, which meet regularly for discussions but do not have a specific charter.

Current Working Groups

To join any of the technical working groups, please click the mailing list link below and visit their corresponding wiki page.

Name	Description	Lead	Mailing List
Full Architecture WG (FAWG)	Architecture standing committee to develop the overall architecture for LF Energy	Benoît Jeanson, RTE	Full Architecture WG Mailing List
