

# Working Groups

Technical working groups are organized underneath the [Technical Advisory Council](#) in order to perform detailed work in a specific area. Working groups generally work on a specific aspect of the functional architecture. They may have a specific deliverable and can make suggestions on existing projects or propose projects.

Working group chairs or leaders report up to the TAC, but do not vote on TAC business.

Working groups are distinct from [Projects](#), which create software or services, and Special Interest Groups, which meet regularly for discussions but do not have a specific charter.
