

Meetings 2024

Meeting 23-04-2024 16:00

Attendees

- Juan Galeano (Fito)
- Florian Oppermann

Discussion & Action Items

Item	Notes
Open discussion	Only ACS participants. TAC review and situation of OpenSSF. Organizational points. Cimgen template issue: Added data validation with Pydantic, and raised a generation problem on Cimpv.

Meeting 26-03-2024 16:00

Attendees

- Juan Galeano (Fito)
- Florian Oppermann
- Saloni Dhingra

Discussion & Action Items

Item	Notes
Open discussion	Only ACS participants. Current status and organizational points. Discussion about the PR received from Alliander. Pyvolt and the current Demo.

Meeting 27-02-2024 16:00

Attendees

- Juan Galeano (Fito)
- Florian Oppermann
- Mattia Alfieri
- Ciro Cavacchini
- Francesco Rizzi

Discussion Items

Item	Notes
Experiences with Sogno	Some experience from Areti: Pyvolt is used with success. Had a small issue that was solved by limiting Iterations.
License Scan results	The results of the license scan were explained and what are the next steps. Add a notice in the Readme explaining the license of the Bitnami docker image.
Roadmap and Possibilities	We are open for contributors to add new services and fixes. Explanations on how to contribute were given (add users to repo, requirements such as sign-off commits). Pull requests are welcome.
Related research projects	Explained the hackathon in cooperation with Alliander and how an integration between SOGNO and Power Grid Model was accomplished, the code can be found in the repository. Open Energy Twin is a new project proposal related to SOGNO and can be aligned with other requirements/user stories.

Organization

The SOGNO roadmap is being drafted by Florian and Fito.
