

CoMPAS product vision

For utility/integrator/vendor companies

Who want to have flexibility, agility and efficiency in their SCL configurations

CoMPAS

is a IEC 61850 SCL configuration management/configuration ecosystem (including tools)

That offers a centrally managed, open source, extensible, customizable, user friendly, SCL editing and management tools

Unlike proprietary, vendor specific, desktop oriented, limited integration options, not user friendly tools

Our product gives flexibility, control over your own roadmap, prevent a vendor-lock-in and uses the power of open source, modern technologies to help the energy transition.
