

# 2023-08-07 TSC 16

Chaired by Frank

## Attendees:

Jonas, Frederik, Frank

## Discussion items

Time	Item	Who	Notes
0min	Look back on actions previous TSC	Frank	
	ML4Net	Jonas	<p>Possible user/collaboration of OpenSTEF</p> <p>ML4Net is a starting research project on explainability / transparency of AI models and in particular model and input uncertainty used in the energy sector. Started by Dutch Metrology Organisation, other partner is TUDelft. They are writing down a research proposal and want to use data of OpenSTEF or implement their findings in OpenSTEF.</p> <p>Alliander is investigating if they can contribute as a non-funded or interested partner.</p>
	LFE security audit	Jonas	<p>From LFE there is opportunity to get a security audit. Do we want to submit as a pilot project?</p> <p>Let's give other project the opportunity for now.</p>
	OpenSTEF Meetup	Jonas	<p>PowerGridModel is hosting MeetUps twice a year. Showing usecases and break out into 'how to' and 'roadmap discussion'.</p> <p>Perhaps it's a bit early for a bigger community meetup, but can we organize a meetup between Alliander and RTE? Let's discuss next TSC</p>
10min	AI for the Future Energy System	Frank	<p>POC phase lasts until end of september. Results of data science analyses are available on sharepoint and notebooks on the AIFES repository <a href="#">alliander-opensource/AIFES: AI for the Future Energy System (github.com)</a></p> <p>Idea Jonas: Nice to share some of these results or progress with a blogpost (LFEnergy &amp; intranet &amp; AIFES-promotional?)</p> <p>Note that during september the Alliander OSPO will blog about open source stuff, would be nice to match this</p>

## Action:

- ✓ Jonas Checks with Benoit/Boris (same action as last time)
- ✓ FK: Ask TUDelft what they do on forecasting and their collaboration with RTE (same as last time)
- ✓ FK: Check with RTE if we can organize a meetup during next TSC
- ✓ FK: Discuss with Martijn if/how/when we can blog about AIFES results
