

# 20 february 2024

Participants:

Tamas, Jakob, Sander, Catalina, Daniel, Pascal

Decissions made today:

Tamas will schedule a meeting with LF energy for onboarding

We decided on the first logo for OpenSCD

Sander, Davood an Tamas will discuss a PACwold submission

20% of the population should be able to install OpenSCD; We can take here a step-by-step approach (start small). The plug-ins swapping is the most important for people to build a distribution. The distribution generation shall be outside the core-functionality.

Squash and merge should be the only option in OpenSCD
