Where to put what content

In order to prevent confusion, here are some guidelines on where to put what information.

DRAFT

We currently use:

Wiki (end-user documentation)
Github issues (in every repositories)
Github discussions (every repositories)
ADR's
LF energy Confluence
Readme.md (in every repository)
Youtube tutorials

Acceptance critria:
Proposal: Where to locate what
Disable unwanted documentation locations

Future plan

Subject	Where to store it
Feature requests	Issues · openscd/open-scd (github.com)
Questions	Issues · openscd/open-scd (github.com)
Bug reports	Issues · openscd/open-scd (github.com)
Technical discussions	openscd/open-scd · Discussions · GitHub
Repository describtion and technical documentation related to to the repository	Repository (e.g. readme.md)
Architectural decisions	open-scd/docs/decisions at main · openscd/open-scd (github.com)
Way of working	LF energy confluence
Community improvement points	Issues · openscd/open-scd (github.com)
Meeting notes	LF energy confluence
End-user documentation	Home · openscd/open-scd Wiki (github.com)
Video's	LF energy youtube channel (ask Dan Brown)
Chat	lfenergy.slack.com
Roadmap	Projects · openscd (github.com)

Todo

Disable the wiki and issues all repositories expect: openscd/open-scd: A substation configuration description editor for projects using SCL IEC 61850-6 Edition 2 or greater (github.com)

Move openscd/.community (github.com) to openscd github issues

openscd/.github remove ADR's and history and move it to open-scd repository

Issues · openscd/openscd.github.io

Update Readme.md:

- Documentation repoistory
- openscd/openscd.github.io: OpenSCD front page

Remove:

Kanban board · [Deprecated] Migration Plan - OpenSCD Core (github.com)
